Summary

A passionate Backend Developer with 2 years of experience in web development and AI. Skilled in building scalable, efficient, and secure backend systems, with a strong focus on optimizing business processes through AI solutions. Always eager to learn and innovate in the tech space. Currently seeking an opportunity in a state-owned enterprise (BUMN) to contribute to impactful digital transformation projects.

Experience

Batam State Polytechnic | Batam, Indonesia
Full Stack Engineer | 09/2023 - Present

- **Build WebApp Delivery Service** : I developed a *WebApp Delivery Service for my first-semester PBL project, focusing on service booking and order management. It allowed customers to schedule services while businesses handled requests efficiently. I built a secure backend, optimized performance, and ensured usability, gaining valuable experience in web development and system design.*
- **Build System Information Based CMS** : *I developed a School Information System CMS for SMK Muhammadiyah Batam Kota as a PBL project. The system streamlined school data management, including student records and announcements. I built a secure backend, optimized usability, and improved accessibility, gaining hands-on experience in CMS development and database management.*
- **Build Learning Manegement Sytem Based AI DSS** : *I developed an AI-powered Learning Management System (LMS) for workers in Batam as my third-semester PBL project. The platform integrates Decision Support System (DSS) modules to recommend courses based on user needs. This project enhanced my skills in AI integration, web development, and LMS architecture for workforce training.*

Cursor.id | Bandung,Indonesia
Product Manager | 05/2023 - 05/2024

As the product manager for AppDoc at a beauty house in Bandung, I manage the development team, create project schedules, and ensure the quality of the application. I also facilitate communication between the team and stakeholders to meet user needs.As the product manager for AppDoc at a beauty house in Bandung, I manage the development team, create project schedules, and ensure the quality of the application. I also facilitate communication between the team and stakeholders to meet user needs.

WekodeHub | Jakarta,Indonesia
Assistant Chief Technologi Oficer | 01/2022 - 08/2022

At WeKode, I work as an Assistant Chief Technology Officer, helping shape and develop the company's technology strategy alongside the CTO. My role involves managing and optimizing backend architecture to keep systems scalable and secure. I also contribute to AI-driven solutions that improve business efficiency. Collaborating with different teams, I help bring innovative technologies into our workflow while staying updated on the latest tech trends to support the company's growth.
